## Annotation Guideline

In this study, we ask that you label the messages using the following codes.

First, we ask you to identify references to:

- **Gender:** if it mentions or is about men, women, nonbinary, other genders not specified in the previous labels (other gender).
- **Sexuality:** if it mentions or is about heterosexual, homosexual, bisexual, other sexualities not specified in the previous labels (other sexuality).
- **Unclear:** if you are uncertain about its meaning and cannot determine if it refers to gender or sexuality.
- **None of the above:** if you are certain about its meaning and can determine it is not related to neither gender nor sexuality.

Second, we ask you to rate the "hatefulness" of the message, and if targets gender and/or sexuality. A message is considered:

- **Hate speech:** if it contains bias-motivated, hostile, malicious language targeted at a person/group because of their actual or perceived innate characteristics.

## Annotation Guideline

In this study, we ask that you label the messages using the following codes.

First, we ask you to identify references to:

- **Gender:** if it mentions or is about men, women, nonbinary, other genders not specified in the previous labels (other gender).
- **Sexuality:** if it mentions or is about heterosexual, homosexual, bisexual, other sexualities not specified in the previous labels (other sexuality).
- **Unclear:** if you are uncertain about its meaning and cannot determine if it refers to gender or sexuality.
- **None of the above:** if you are certain about its meaning and can determine it is not related to neither gender nor sexuality.

Second, we ask you to rate the "hatefulness" of the message, and if targets gender and/or sexuality. A message is considered:

- **Hate speech:** if it contains bias-motivated, hostile, malicious language targeted at a person/group because of their actual or perceived innate characteristics.

## Content Warning

You are about to read comments from Youtube, Reddit, Gab, and Twitter from existing **Hate Speech and Abusive Language** datasets.

The messages may contain or not a diverse typology of harmful expressions, which may independently reflect gender and sexuality in nuanced ways.
